

Management of the MIU Cryptocurrency Endowment Fund

Crypto instruments may be held in the form in which they were given (e.g. - bitcoin, ethereum, et al.), or traded within the crypto ecosystem with the goal to maximize value. A Crypto Advisory Board will be established to offer trading advice. The Alumni Director (currently Paul Stokstad) will organize the Advisory Board and be tasked with placing orders. (Paul will not make investment decisions himself.)

Safeguards will prohibit margin trading or other practices that could result in loss by the University of more than the original donated assets. Paul shall provide reports to the Treasurer's office as requested; the Treasurer's office also shall have its own online access to the Crypto Fund account(s). No funds shall be withdrawn from the Crypto Fund other than through the Treasurer's office.
